

# MUHAMMAD HUZAIFA

## FULLSTACK DEVELOPER

+92 303 6218262 | [huzaifakhawar100@gmail.com](mailto:huzaifakhawar100@gmail.com) | [Portfolio](#) | [LinkedIn Profile](#)

## PROFILE SUMMARY

Motivated and reliable full-stack developer with a strong desire to learn new technologies, passionate to work with teams and grow in the field of Information Technology.

## EXPERIENCE

**Mern Stack** Onsite  
Viral Square. ASE

Feb 2025 – Present

**Mern Stack** Onsite  
Viral Square. Probation

Oct 2024 – Feb 2024

## PROJECTS

⚙️ **Technologies:** React.js, HTML5, CSS3, Node, MongoDB, Postgres

### FootballAroundMe (FAM)

- Contributed to the enhancement and maintenance of the FootballAroundMe app by troubleshooting and resolving issues, debugging errors, and implementing client-driven change requests. Ensured smooth functionality for features such as nearby match search, travel time estimation, stadium and amenity details, and personalized match preferences. This emphasizes your involvement in problem-solving and addressing client needs while maintaining a professional tone.

### PinTv

- Contributed to the development and optimization of a wrestling hub platform, offering features such as live match streaming, player performance tracking, and detailed scoreboards. Managed various teams, weight classes, and tournaments, pools, ensuring smooth functionality for real-time updates on player stats, rankings, and progress. Played a key role in enhancing the user experience by improving the platform's performance and reliability during live events. This version better reflects the broader scope of your involvement in the project, beyond just the scoreboard.

**Trainee MERN Stack Developer** Remote  
Buggcy. Internship

July 2024 – Oct 2024

## PROJECTS

⚙️ **Technologies:** React.js, Next.js, TypeScript, Tailwind CSS, HTML5, CSS3, Node, MongoDB

## PROJECTS

🔧 **Technologies:** React.js, Next.js, TypeScript, Tailwind CSS, HTML5, CSS3, Node, MongoDB

### HRM Portal

- Developed key UI components for an HRM platform, including Notification System (interactive dropdown, notification page for unread/read/all notifications) and Announcement Module (priority-based announcements in ShadCN tables).
- Built Policy Service Page to display company policies in a user-friendly table layout.

### Full-Stack User Profile Application

- Created a full-stack application with features like user registration, authentication, profile editing, password change, and email-based password reset.

### E-commerce Front-end

- Designed and implemented a responsive front-end for an e-commerce website. Customization of template, integration of fake e-commerce API

### Mastermind Game

- Developed an interactive Mastermind game with HTML, CSS, and JavaScript, focusing on DOM manipulation.

### Figma to Code Responsive

- Built a responsive website using HTML, CSS, and JavaScript based on a Figma design.

---

## EDUCATION
